5 Bottle Installation

- The device is comparable 5/10/15/20ml bottles.

Removal:

Push from the top until you hear a click, then release. The nozzle will stick out. You may pull it out to change or install bottles of essential oil.

Installation:

Pull out the nozzle and screw the bottle into the bottom. To reinsert the nozzle, line up the"▲▼" signs and push the nozzle down until you hear a click.

6 Charging

Normal charging time: 3-5 hours.
If the charging current is below 1A,
the battery will take longer to fully charge.

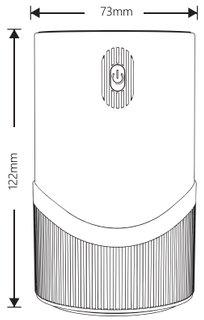

- You may charge from a 5V USB adapter,PC/MAC USB port, or USB interface within your vehicle. Only use safety-certified charging accessories.

PC/MAC USB port **Car USB port** **Adapter**

- The light above the charging port will glow red to indicate that the diffuser is charging.
- As charging cycles increase, battery life will decrease.

7 Specifications

Oil Capacity: 5-20ml
Input: DC-5V/1A
Rated Power: 1.5W

Size: 73*122mm
Battery Capacity: 2000mAh
Net Weight: 300g

8 FAQ

Q1: How do I select the right essential oil?
Use 100% pure essential oils. Resin and thick oils are not recommended. DO NOT use camphor tree oil.

Q2: When I change to a new oil, there is a mixed smell coming from my previous oil. How do I clean the nozzle and the bottle?
Regular cleaning: Fill the empty essential oil bottle with 5ml of 99% ethyl/ethanol alcohol, install the bottle into the diffuser, and run the device until it runs out.
Deep cleaning: Fill the 20ml bottle with 99% ethyl/ethanol alcohol, install the bottle into the diffuser, and let it soak for 1 day. Remove the bottle from the diffuser and empty the alcohol. Refill the bottle with 5ml of ethyl/ethanol alcohol, reinsert the bottle into the diffuser, and run the device until it runs out.

Q3: Why does my diffuser stop running sometimes?
Please refer to section 4 to see atomization and timing options.
The device will rest according to the atomization level and turn off according to the timing option.

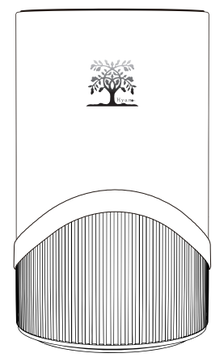

Q4: How long does it take to fully charge the device?
Normal charging time is 3-5 hours. The time may vary depending on the charging current, charging accessory, and the number of charge cycles the battery has gone through.

Q5. Why won't my diffuser turn on?
The diffuser has built in electrostatic protection. If your diffuser fails to turn on, try plugging it in first before you turn it on.

Q6. Why won't my diffuser produce any mist?
This may be caused by a blocked atomizer. To fix this, you can try replacing the atomizer with one of the replacement parts found in the included replacement parts pack.

USER MANUAL

Reading carefully before using the machine

Thank you for choosing our products, you will have a pleasant experience.

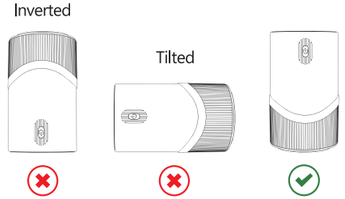

1 Overview

The diffuser converts essential oil into 1-3 micron nano vapor without using heat or water.
The diffusing process does not damage the molecular structure of the oil and the therapeutic properties are maintained, making it safer and more hygienic.
The diffuser is compact enough to fit into car cup holders, making it easy to take it with you wherever you go.

Our diffuser is compatible with a majority of the available essential oil bottles, allowing you to choose from a wide range of fragrances that suit your needs. Using essential oils can purify surrounding air and improve unpleasant odors.

2 Cautions

- **DO NOT** invert or tilt the diffuser once an essential oil bottle is installed.
- **DO NOT** use with camphor tree oil.
- **DO NOT** attempt to disassemble the device.
- For more quiet use, place the diffuser at least **3 feet away.**
- Keep the device away from children and pets.
- If an oil is more concentrated, it cannot be diffused as efficiently.
- If you do not plan on using the diffuser for an extended period of time, store the device and the nozzle separately.
- Working Temperature: **0°C -45°C**

3 What's in the Box

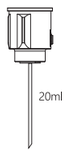

Diffuser
